

Kyle Simpson - ENGINEERING PHYSICS

kjsimpson1@outlook.com | [LinkedIn](#) | [Project Portfolio](#) | 250-328-8469

PROFILE

UBC Engineering Physics student with practical experience in mechanical, software, and electrical engineering. Strong problem-solving and technical skills, demonstrated leadership in team projects, and hands-on expertise through personal projects and work experience. Personal interests include skiing, weightlifting, and music.

SKILLS

Technical: CAD (SolidWorks and OnShape), Technical Drawings, Prototyping

Software: Excel, C, C++, MATLAB, Java, Python

Hardware: Circuit Analysis, Soldering, 3D Printing, Vehicle Engine Repair, Carpentry, Metal Working

WORK EXPERIENCE AND PERSONAL PROJECTS

Splash BC Waterparks Locational Manager and Sales Representative

June 2022 – August 2026

1010 Lakeshore Drive, Penticton, British Columbia

- Achieved highest local sales performance while delivering strong customer service.
- Diagnosed and repaired park equipment, including inflatable structures, generators, and payment systems.
- Implemented and improved safety protocols reducing major injuries to zero and improving minor injury response time by 50%.

Kieson Fabrication and Machine Ltd. Metal Fabrication Assistant

June 2021 – August 2021

2001 Barnes Street, Penticton, British Columbia

- Operated and maintained Hypertherm HD Plasma Table, optimizing part nesting to reduce waste by 25%.
- Maintained a safe, organized workspace exceeding WorkSafeBC standards and improving floor efficiency.

Rebuilding and Maintaining a 2006 Toyota Tacoma

August 2021 – Present

- Used troubleshooting and problem solving techniques to find broken parts
- Replaced key drivetrain and suspension components (O2 sensors, axle assemblies, universal joints, etc.).
- Designed and fabricated custom steel bumpers, skid plate, and integrated stereo, and reverse camera.
- More information available on my [Project Portfolio](#)

Creating an Autonomous Robot

June 2026 - August 2026

- Designed and implemented a fully autonomous and adaptive robot design to perform tasks
- Integrated sensors into response system to respond to changing conditions
- More information on my [Project Portfolio](#)

EDUCATION

Engineering Physics, BAsC. (September 2024 - April 2029, Third Year Standing)

UBC, Point Grey, Vancouver

Key Courses: Linear Circuits; Principles of Software Construction; Experimental Techniques
Instrument Design
